TECHNICAL SPECS

ANIMATION PRINCIPLES

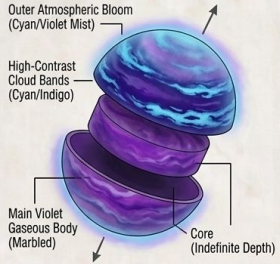

PLANET STYLE SHEET: “VIOLET-NEBULA”

1. VISUAL REFERENCE: STANDARD ORBIT

2. CORE STRUCTURE & LAYER COMPOSITION

3. COLOR PALETTE & ATMOSPHERIC BLEND

PRIMARY VIOLET: #6A0DAD

INDIGO DEPTH: #4B0082

Gradient in layors of different violett: blend erelıminatic and imgining reality.

ATMOSPHERIC GLOW: #00FFFF

Tnospheric glow attetms atmospheric ferm nature.

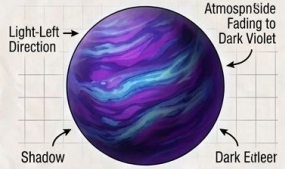

NEBULA MIST: #9370DB

Nebula mist of blend: blend of mesanic violet of, cyan reality.

4. LIGHTING & SHADING GUIDELINES

4a. NORMAL LIGHT
(Upper-Left Source)

4b. SHADOW SIDE
(Right Side Fading to Dark Violet)

5. VR INTERACTION & TRANSITION PHASES

TECHNICAL DATA & ANIMATION SPECIFICATIONS - DESIGN TEAM REVIEW

Based on Storyboard: THE COSMIC VIEW

STORYBOARD: THE COSMIC VIEW

1 THE UNVEILING

1. Explorer floating in outer space views Earth.

2 THE DROP

2. Explorer sees a VR headset dropped down onto planet.

3 A SOFT BEACON

3. The headset starts to glow, a quiet invitation. (PANEL ON ITS OWN, ZOOMED IN HAND)

4 THE DECISIVE ACT

5. POV switches to the first person, greying out reality.

6 THE DELUGE

6. First VR scene: a devastating flood destroys a city.

7 SHELTER IN THE STORM

7. Looking right, people take refuge under a tree from the flood.

8 THE BURDENED WALK

8. People walk through the flood with their belongings, sad and gloomy.

9 RETURNING TO THE VOID

9. The Explorer takes off the headset, now profoundly sad.

10 DETERMINED FOCUS

10. The Explorer is left back in space, with a determined expression, looking

STORYBOARD: THE COSMIC VIEW

1 THE COSMIC CONSOLE

1. Human interacts with the celestial viewer from the control console.

2 THE UNVEILING

2. Distant view of planet from deep space.

3 A SOFT BEACON

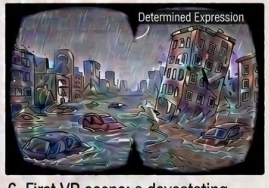

3. The planet from deep space, an invitation to connect.

4 THE DECISIVE ACT

5. POV switches to first person, greying out reality.

6 POV TRANSITION

6. First VR scene: a devastating flood destroys a city.

7 SHELTER IN THE STORM

9. Looking right, people take refuge under a tree from the flood.

8 THE BURDENED WALK

10. The VR simulation concludes, returning to the silent void.

11 DETERMINED FOCUS

11. Space is left in quiet, determined

12 THE CYCLICAL GAZE

12. A new gaze begins, cyclical and

List of Assets

Environment & Celestial Assets

- **"Violet-Nebula" Planet:** A gaseous, marbled planet featuring a royal purple base (`#6A0DAD`) with electric cyan atmospheric swirls and a soft outer glow.
- **Deep Space Backdrop:** A dark, star-filled void used as the primary setting for the cosmic sequences.
- **The Cosmic Console:** A high-tech interior environment featuring monitor screens, glowing buttons, and a large "Celestial Viewer" wall screen.

Character & Interaction Assets

- **The Human Observer:** A male figure seen from behind, wearing a neutral-colored jacket, interacting with the console and the final "Cyclical Gaze".
- **The Interacting Hand:** A close-up asset of a human hand reaching out to touch/click the VR headset.
- **VR Headset:** A sleek, dark-colored virtual reality headset with a glowing blue center lens.

Simulation (First-Person) Assets

- **Binocular/Headset Overlay:** A black, dual-lens frame used to signify the first-person perspective (POV) of the VR simulation.
- **The Deluge Cityscape:** A flooded urban environment with partially submerged cars and crumbling, grey buildings.
- **The Shelter Tree:** A large, sturdy tree on a rocky outcrop where silhouetted figures take refuge from the rain.
- **The Burdened Figures:** Silhouetted groups of people carrying belongings through a rainy, flooded landscape.

UI & Symbolic Assets

- **Directional Arrows:** A white dashed arrow indicating the "drop" and movement of the headset toward the planet.
- **Text Labels:** Numbered headers (1-12) and descriptive captions at the bottom of each panel.
- **Focus Reticle:** A small "Focus" indicator used in the final panels to show the observer's attention on the planet.

Character Asset: The Explorer

- **Physical Form:** A minimalist, "bean-style" humanoid figure with a smooth, rounded yellow body and simplified limbs.
- **Facial Features:** Expressive dot-eyes and a simple line mouth capable of showing a range of emotions (sadness with tears, dazed confusion, and "wistful resolve").
- **Signature Accessory:** A circular gold compass or locket hanging from a dark cord around the neck, resting on the chest.
- **Animation Dynamics:** Designed for "Squash and Stretch" principles; the character can flatten into a "puddle" shape when sad or elongate during movement to convey weight and emotion.
- **Color Palette:**
    - **Body:** Vibrant Primary Yellow.
    - **Medallion:** Metallic Gold with a dark grey/black cord.
    - **Outline:** Bold, clean black brushstrokes to maintain a clear silhouette against the dark space background.

Hex Codes

The "Violet-Nebula" Planet & Space

- **Primary Base (`#6A0DAD`):** A deep Royal Purple used for the main gaseous body of the planet.
- **Secondary Swirl (`#4B0082`):** Dark Indigo used to provide depth, shadows, and marbled textures within the planet.
- **Atmospheric Glow (`#00FFFF`):** Electric Cyan used for the high-contrast highlights, cloud bands, and the outer "bloom" effect.
- **Nebula Mist (`#9370DB`):** Medium Orchid used as a transition color to blend the purple and cyan layers.
- **Space Void (`#050510`):** An almost-black Midnight Blue used for the deep space background to make the planet and stars pop.

The Explorer & Human Observer

- **Explorer Body (`#FFD700`):** A vibrant Primary Yellow used for the "bean-style" character to ensure high visibility against dark backgrounds.
- **Medallion Gold (`#D4AF37`):** A metallic gold hex used for the Explorer's signature circular compass/locket.
- **Neutral Jacket (`#8E8E8E`):** A Medium Grey used for the Human Observer's clothing to maintain a grounded, professional look in the console room.
- **Skin Tone (`#E0AC9D`):** A natural Warm Beige used for the human's skin in the console and interaction panels.

The VR Simulation & Console

- **Simulation Grey-Out (`#555555`):** A desaturated Granite Grey used when the POV switches and reality "greys out" before the simulation starts.
- **Flood Water (`#4682B4`):** Steel Blue with murky grey undertones used for the devastating flood scenes.
- **Console Glow (`#1E90FF`):** Dodger Blue used for the glowing screens, buttons, and interface lights on the Cosmic Console.
- **VR Lens Glow (`#ADD8E6`):** Light Blue used specifically for the center lens of the headset to indicate it is powered on and "inviting".

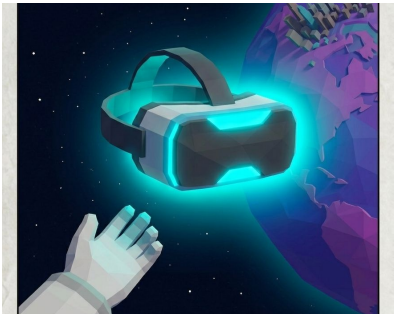

ANCHORED MEMORIES

Immersive Narrative & Haptic Empathy

Core Vision

Anchored Memories is a narrative-driven, haptic VR experience immersing audiences in stories of climate-induced migration in Central Texas. By blending documentary journalism with sensory design, participants navigate a “memoryscape” where spatial audio and full-body haptic feedback create deep, embodied empathy. We challenge guests to reckon with the human cost of climate change while celebrating community resilience.

Need to do:

- What screen holds what
- User flows
- Animate it → Video?
    - Screen One
    - Screen Two → with info be more creative not big words → text has movement
    - Screen Three → more creative expression
    - Touch Screen → what is going → solar system → take them to corresponding system → 3D model

What happens before:

→ Does the still screen look like: people will be walking around randomly

→ Touching the planet will excite one character and then pull them into their specific story

- Screen One
- Screen Two
- Screen Three
- Touch Screen
